Que é Overleaf

- Overleaf é unha ferramenta coa que é posible editar e compilar online código LaTeX, directamente, sen instalar ningún tipo de software no noso ordenador, utilizando tan so un navegador web.

Que é Overleaf

- Overleaf é unha ferramenta coa que é posible editar e compilar online código LaTeX, directamente, sen instalar ningún tipo de software no noso ordenador, utilizando tan so un navegador web.
- O único que terás que facer é rexistrarte en:
<http://www.overleaf.com>

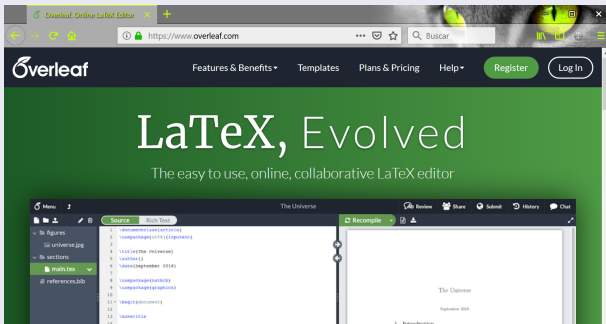

1 Que é Overleaf

2 Rexistrarse en Overleaf

3 Máis información

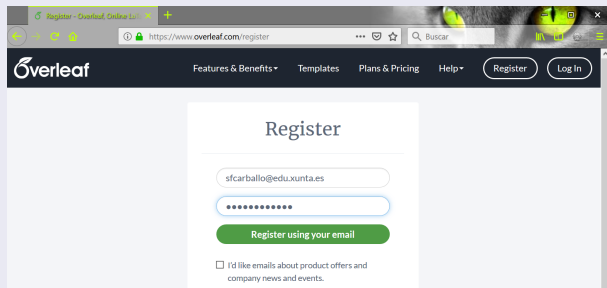

Rexistrarse en Overleaf

- Accede a <http://www.overleaf.com>, e fai click no botón Register

Silvia Fdez. Carballo

- Rexístrate utilizando unha conta de correo electrónica válida

A screenshot of a web browser showing the Overleaf registration page. The browser's address bar displays "https://www.overleaf.com/register". The page features the Overleaf logo on the left and navigation links for "Features & Benefits", "Templates", "Plans & Pricing", and "Help" in the center. On the right, there are "Register" and "Log In" buttons. The main content area is titled "Register" and contains a registration form with two input fields: one for an email address containing "sfcarballo@edu.xunta.es" and another for a password represented by dots. Below the fields is a green "Register using your email" button. At the bottom of the form, there is a checkbox labeled "I'd like emails about product offers and company news and events." which is currently unchecked.

- Rexístrate utilizando unha conta de correo electrónica válida

Silvia Fdez. Carballo

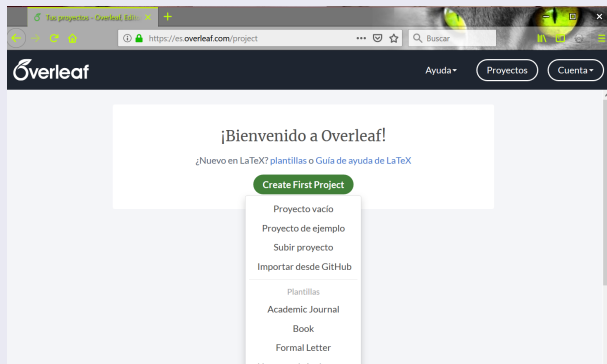

- No sucesivo, as próximas veces, premerás o botón Log In, con esa mesma dirección de correo, e o contrasinal introducido.

- Podes elixir o idioma español

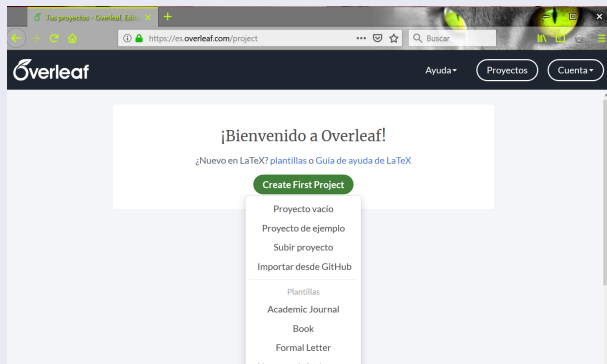

Silvia Fdez. Carballo

- Preme o botón Create First Project

Silvia Fdez. Carballo

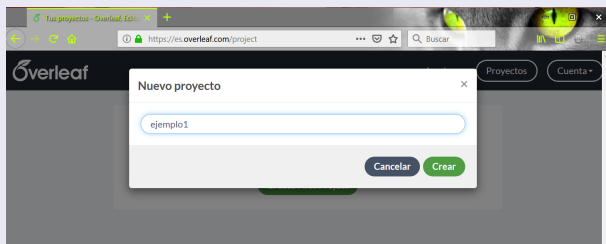

- Preme o botón Create First Project

Silvia Fdez. Carballo

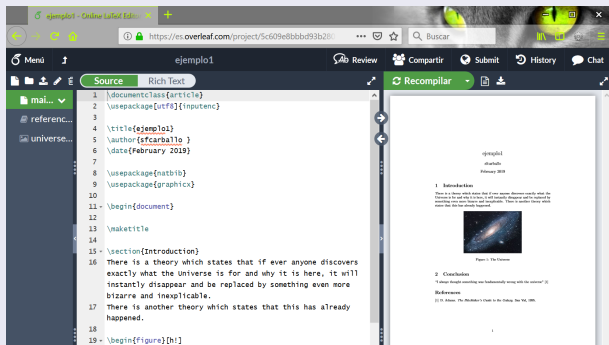

- No despreciable, elixe Proyecto de ejemplo.

- Nomea o teu primeiro proxecto

Silvia Fdez. Carballo

- Velaquí o resultado: Un exemplo de código LaTeX

The screenshot shows the Overleaf web editor interface. On the left, the source code for a LaTeX document is displayed in a dark-themed editor. The code includes package declarations, document metadata, and content for an introduction section. On the right, the rendered PDF document is shown, featuring a title page with the text 'ejemplo', author 'SFCARBALLO', and date 'February 2019'. The introduction section contains a paragraph of text and a figure of a galaxy.

```
1 \documentclass{article}
2 \usepackage[utf8]{inputenc}
3
4 \title{ejemplo}
5 \author{SFCARBALLO}
6 \date{February 2019}
7
8 \usepackage{natbib}
9 \usepackage{graphicx}
10
11 \begin{document}
12
13 \maketitle
14
15 \section{Introduction}
16 There is a theory which states that if ever anyone discovers
17 exactly what the universe is for and why it is here, it will
18 instantly disappear and be replaced by something even more
19 bizarre and inexplicable.
20
21 There is another theory which states that this has already
22 happened.
23
24 \begin{figure}[ht]
```
