A Guide for Using Essential Ed®

Open Your Essential Ed Application

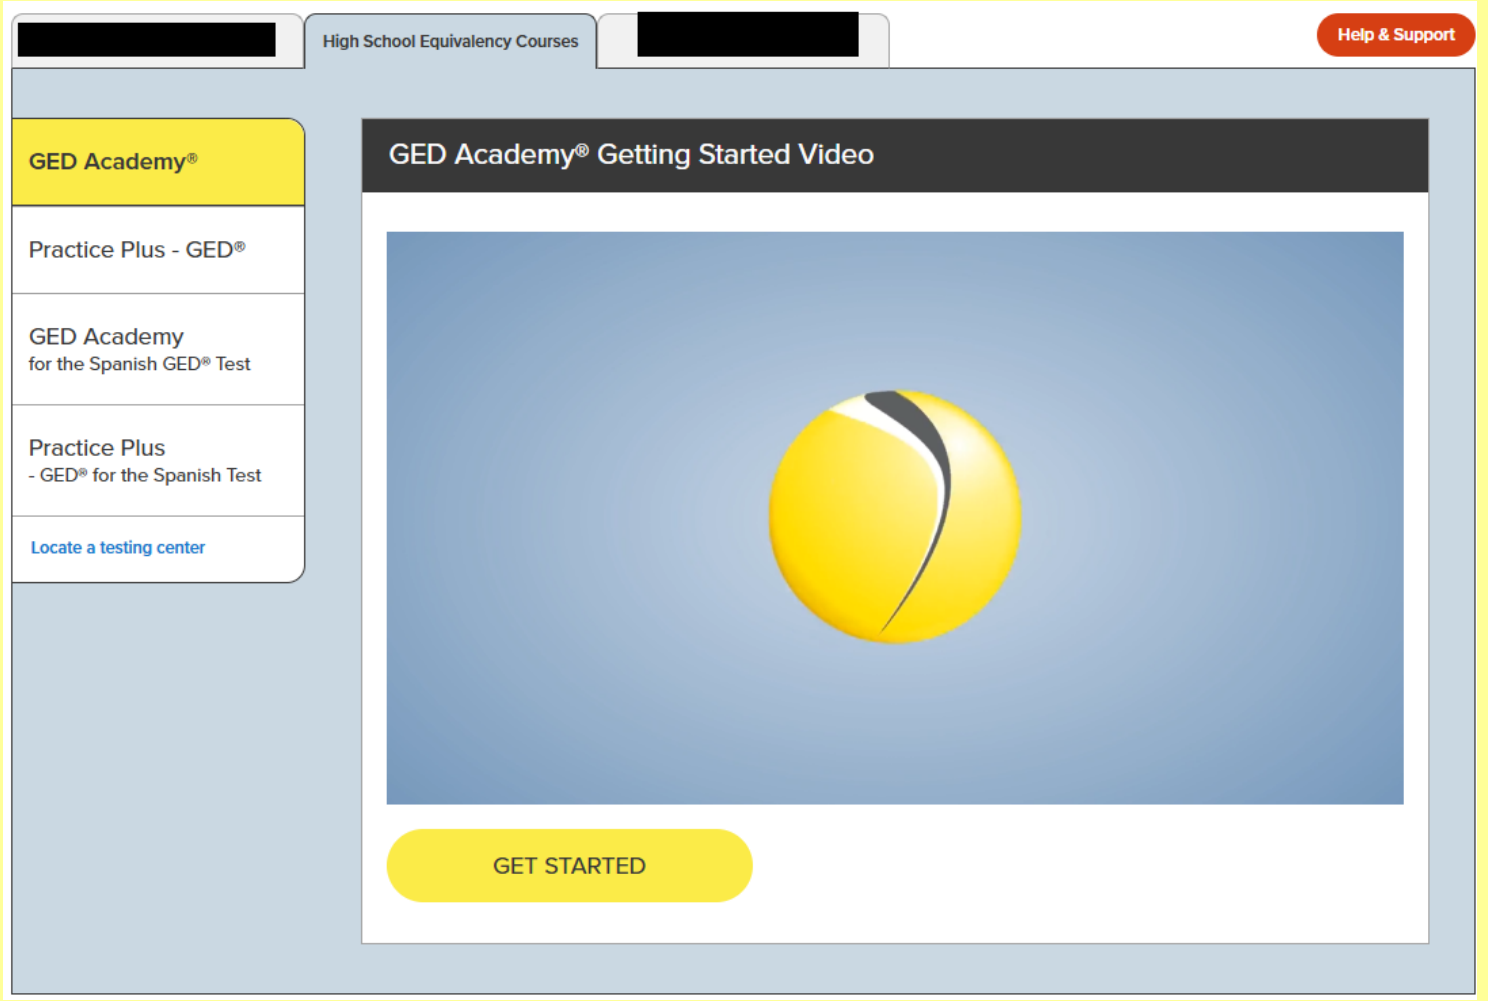

Select: No, if not in class hrs.

Select: Yes, if you are in class

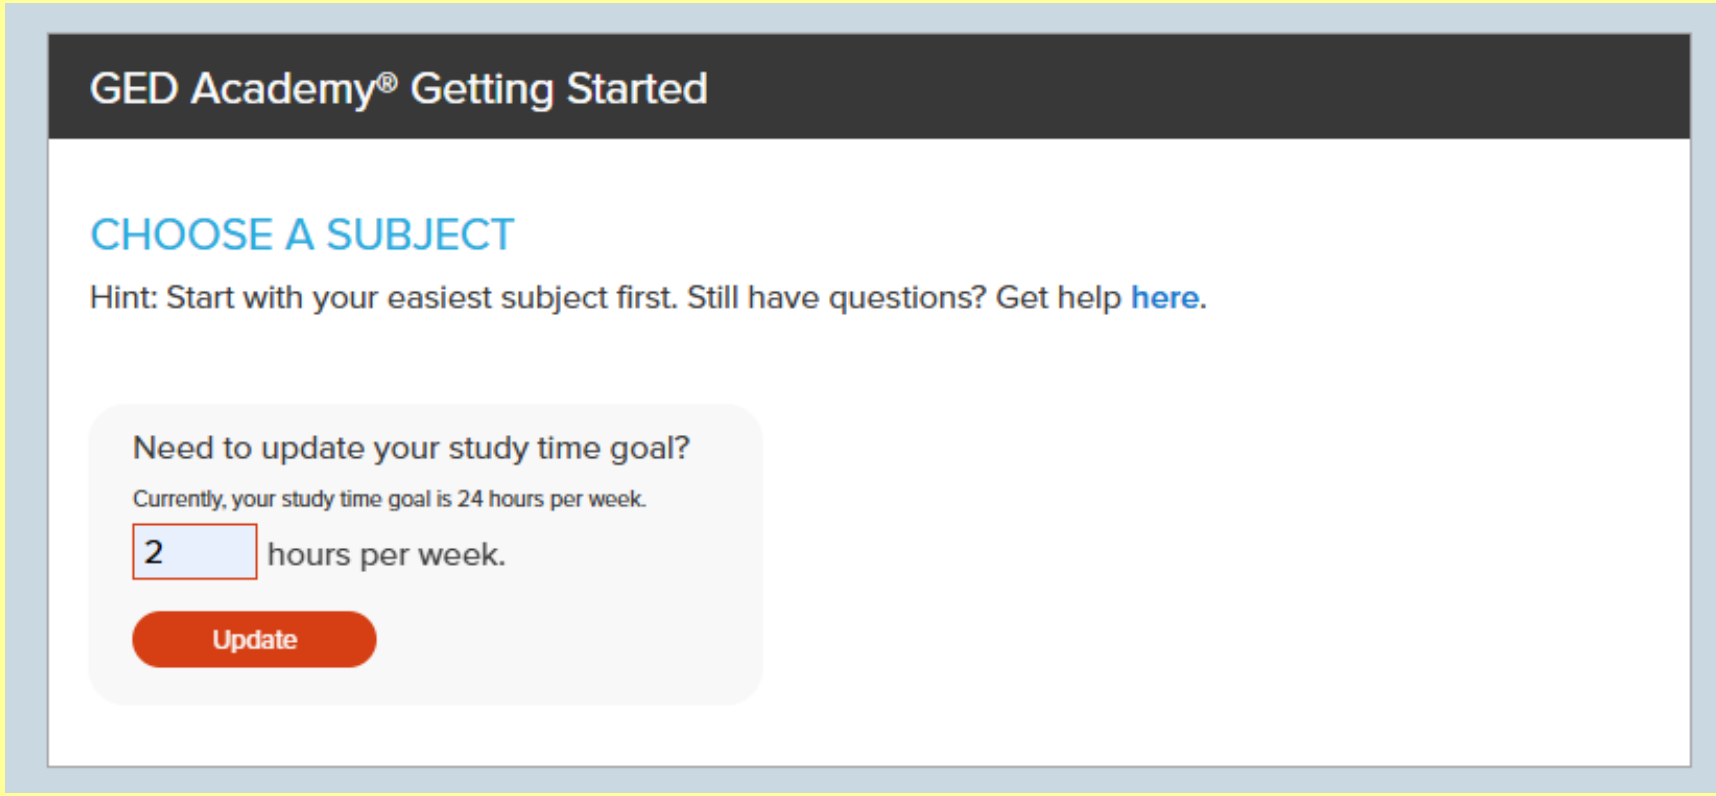

1) Set in/out of class switch, see **top right of page**.
2) Watch to **Introductory Video**.
3) Click on **Get Started.**
4) Select the **Subject** you will be studying.
5) Follow the instructions given to set up your lessons.

Select your weekly Study Time Goal

Commitment: Minimum 2-4 hours/week outside of class.

The Reality: More study time equals a faster graduation.
Want your GED sooner?
Put the hours in now!

Choose a Subject to Study

Some guidelines on subject choices:

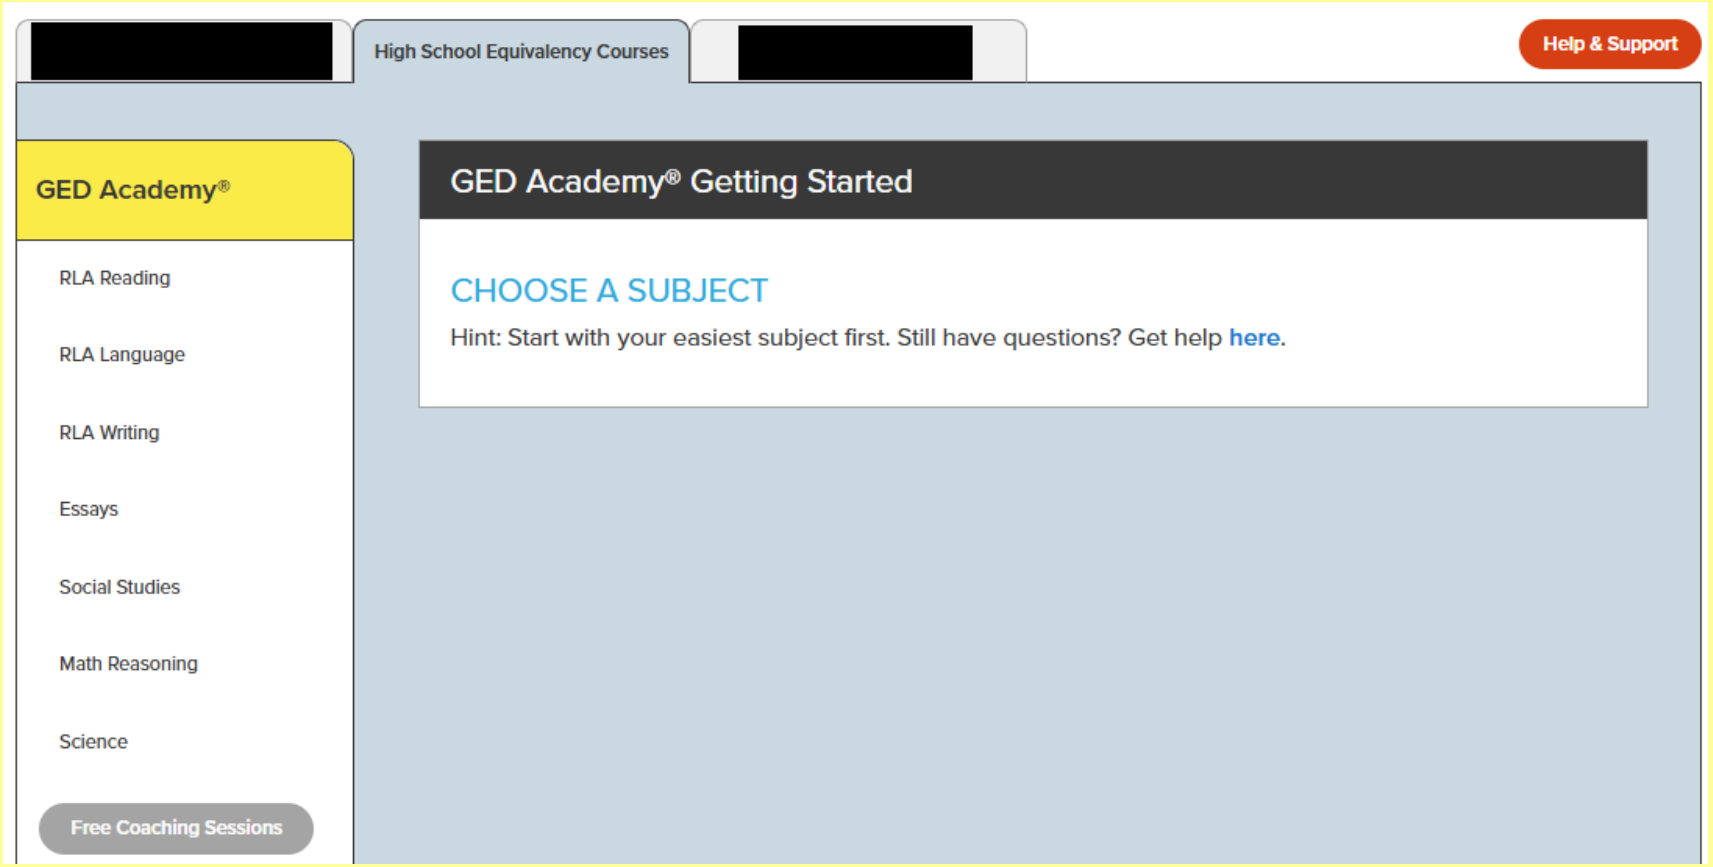

All subject require the RLA reading as component.

RLA requires the following:

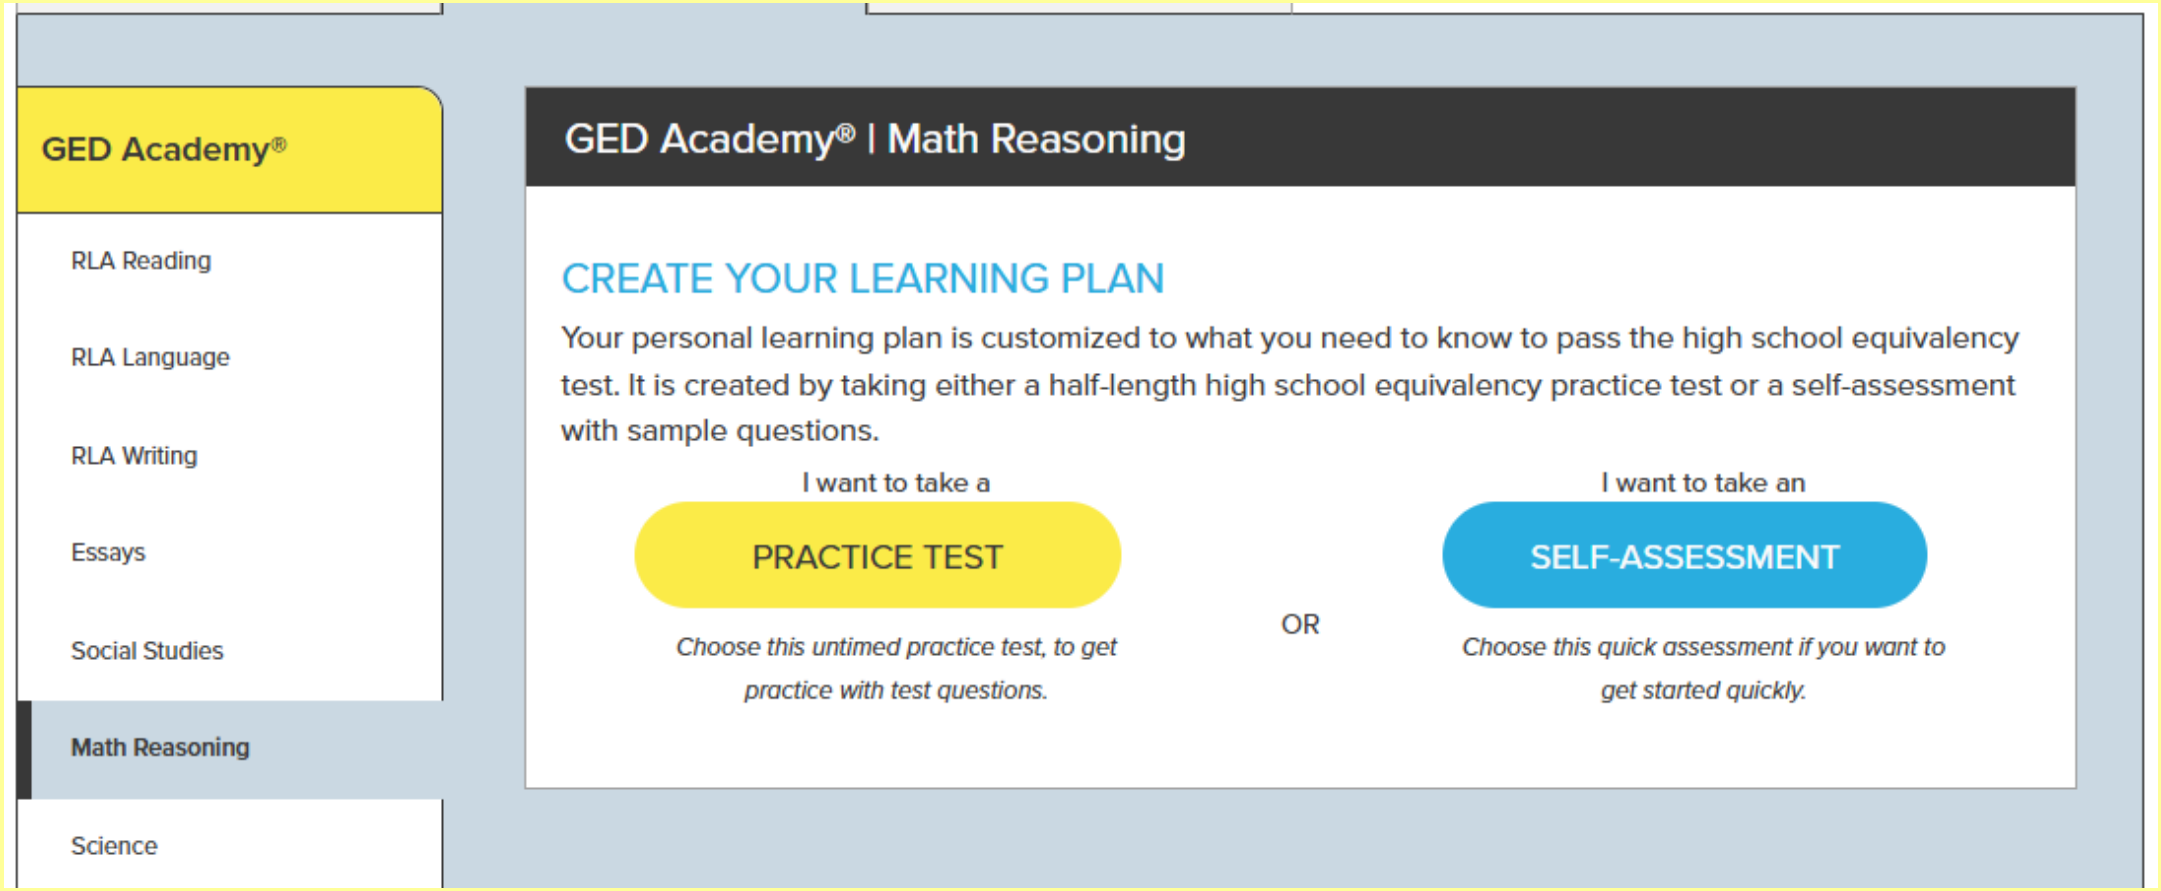

- RLA Reading (35 minutes)
- RLA Language (60 minutes)
- RLA Writing and Essays (45 minutes)

The remaining subject have the appropriate math for the subject material.

- Social Studies (70 minutes)
- Math Reasoning (115 minutes)
- Science (90 minutes)

Always Take the Subject **Practice Test**

Choose a Practice Test. Start with the untimed diagnostic test, followed by the three timed tests designed to prepare you for the real GED Exam. These assessments identify your areas of expertise and map out your custom **Learning Plan**. Next, take the Practice Test.

Review Your Questions

Go back and review the questions and answers you marked for review.

Submit Test

Submit your answers for grading now.

You have completed all questions! You now have two options:
Review: Go back and check the questions you marked for review (if time permits, on the timed tests 2-4).
The next slide shows the Review/Edit page used in testing.
Submit: Finish and submit your test for scoring.

Please select one of the following final actions:
Review Question(s): Revisit only the items previously marked for review.
Review All: Conduct a comprehensive review of all test questions.
Submit Test: Finalize your assessment and view your results.

Great effort so far! While your initial results look promising, there are still key concepts to master before you're fully test-ready.

Think of your score as a roadmap: a lower score simply highlights a greater opportunity for targeted learning. Completing these recommended lessons is exactly how you will close the gap and achieve your goals.

This student achieve 6 of the 8 levels of proficiency and has Learning Plan to get all 8 of them.

Completing Your Learning Plan

You've done a great job so far! However, to secure a passing score on the official GED exam, you must finish your personalized Learning Plan. This plan addresses the specific gaps that could trip you up on harder questions later.

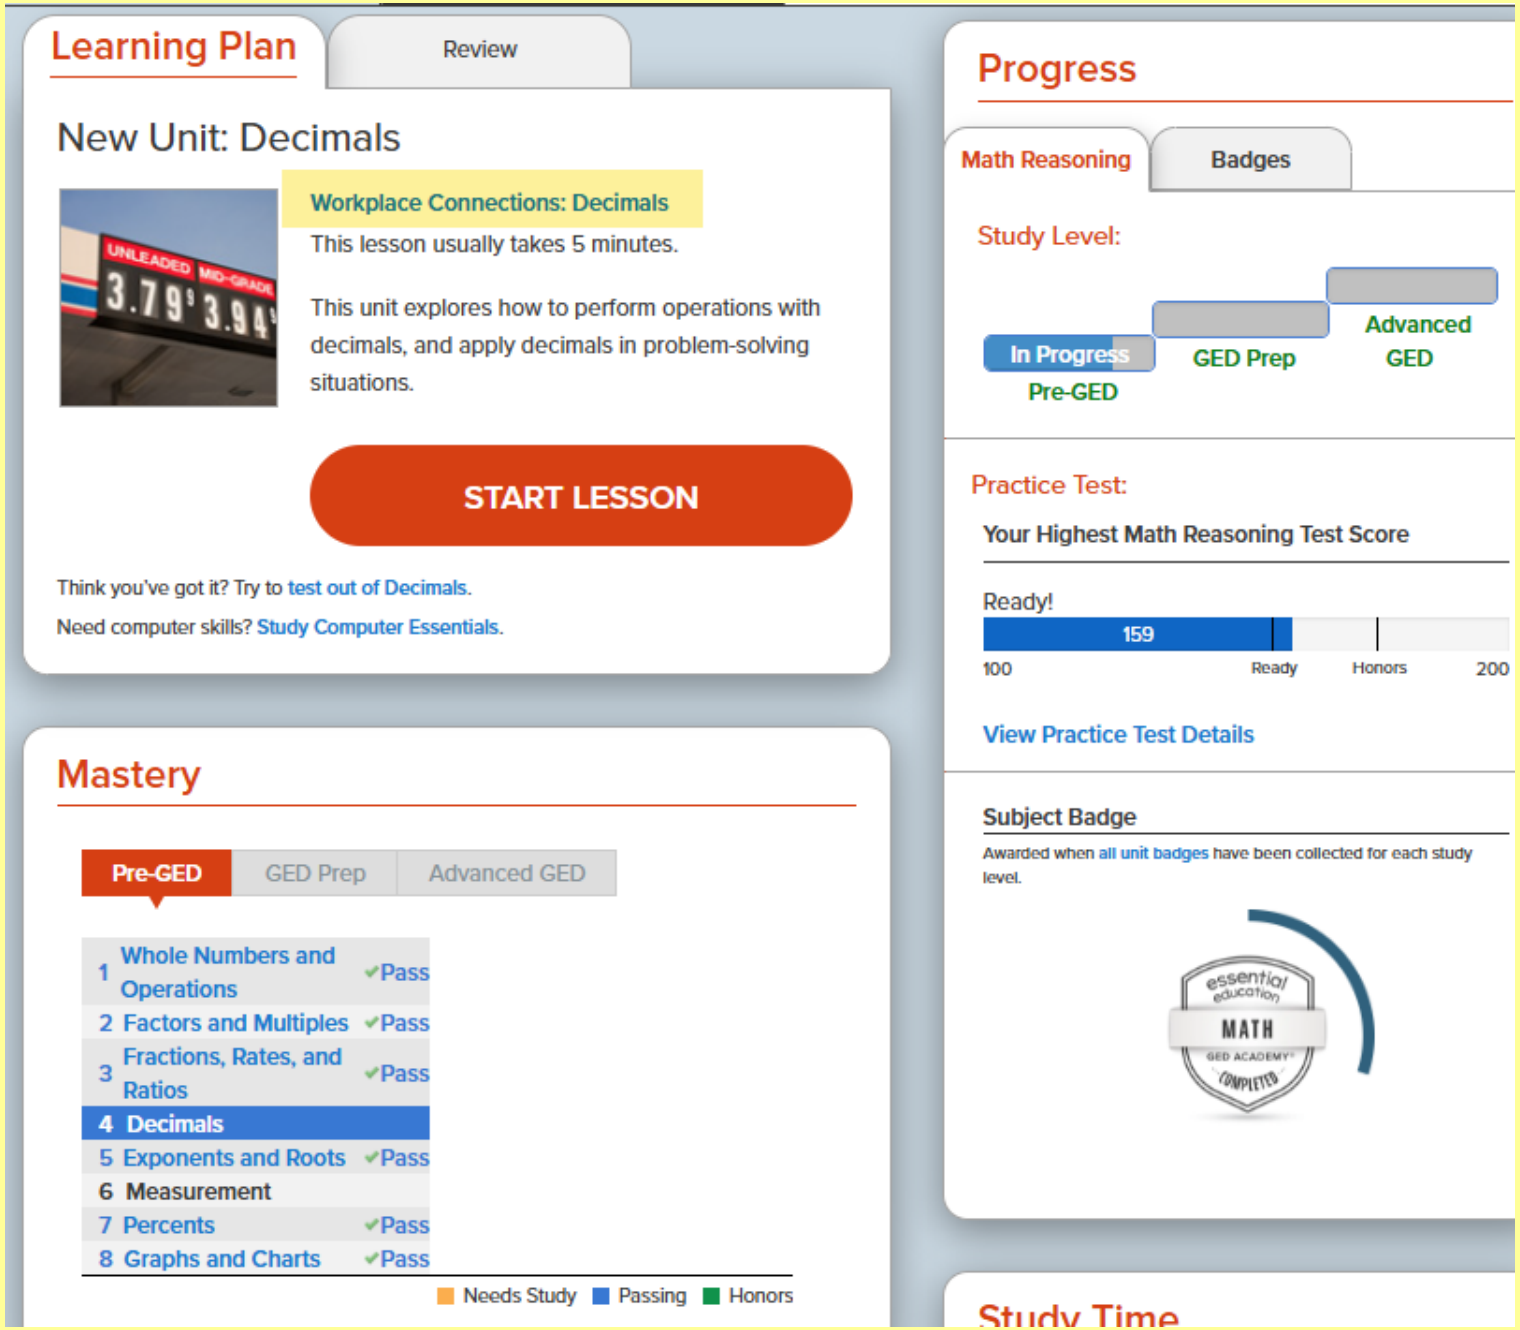

Your Next Steps:

Finish the Plan: Work through all assigned modules to turn weaknesses into strengths.

Build Confidence: You can choose to retake the practice test to prove to yourself that you've mastered the material.

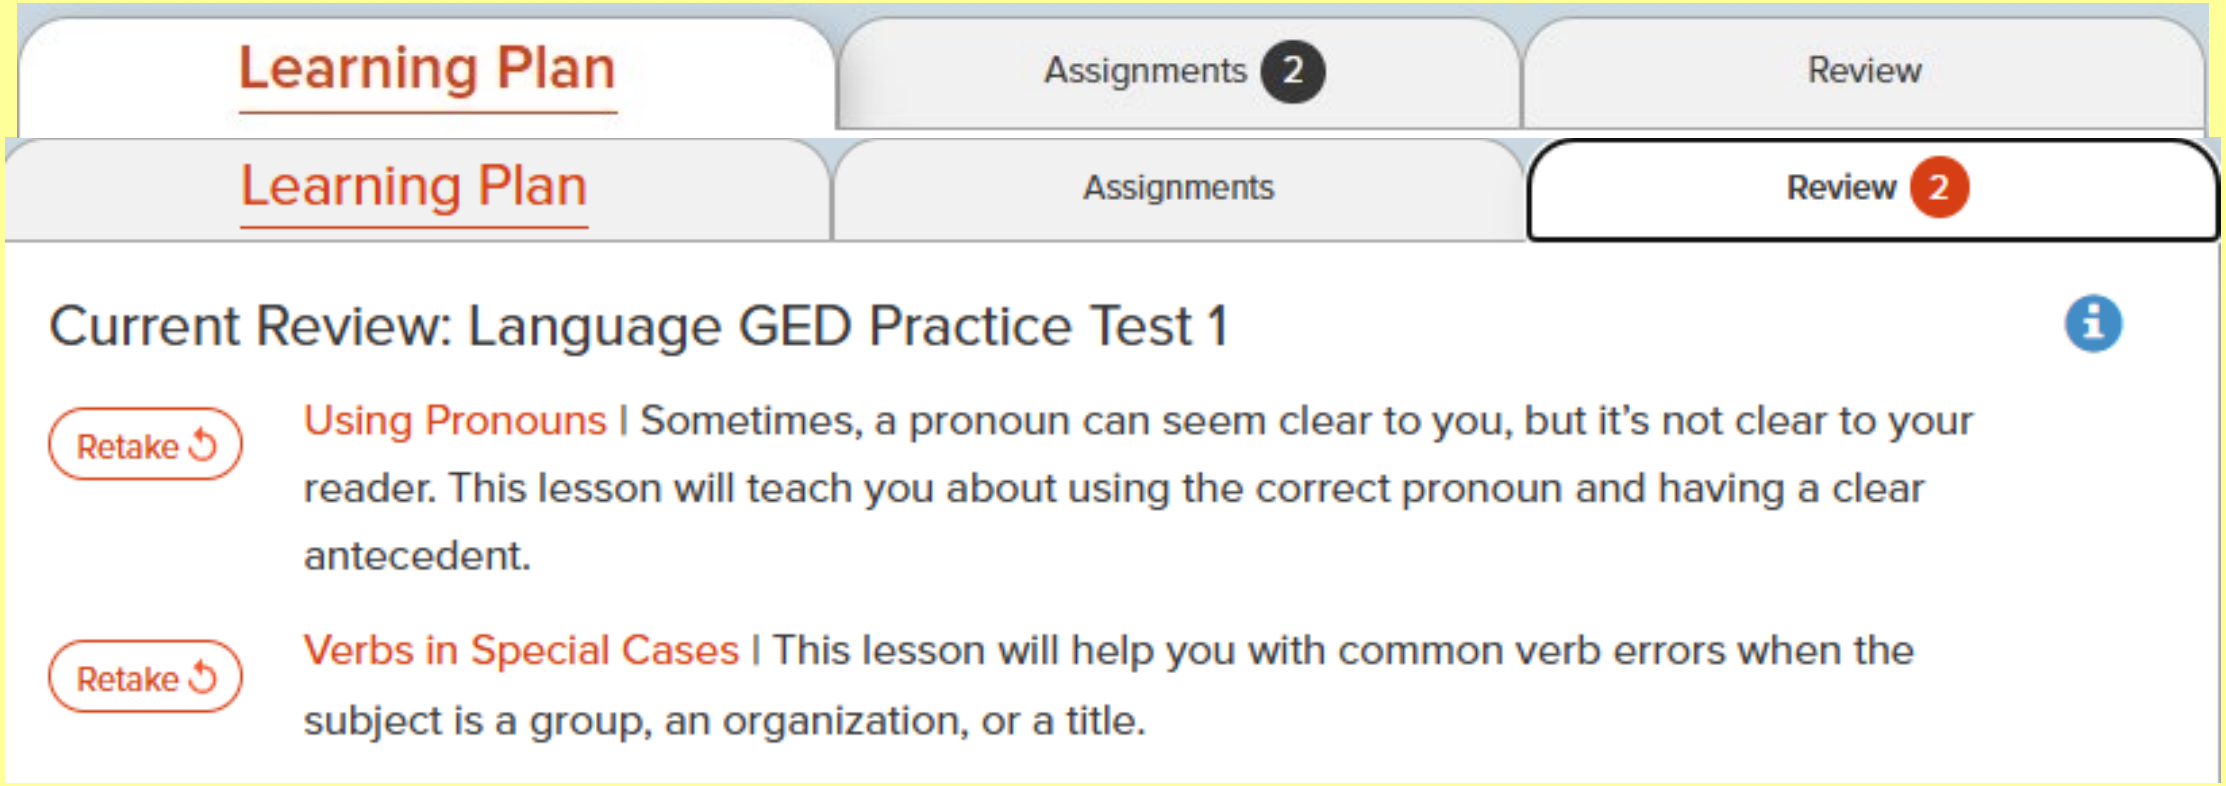

Move Forward: Once you feel ready, ask your instructor for the next-level test.

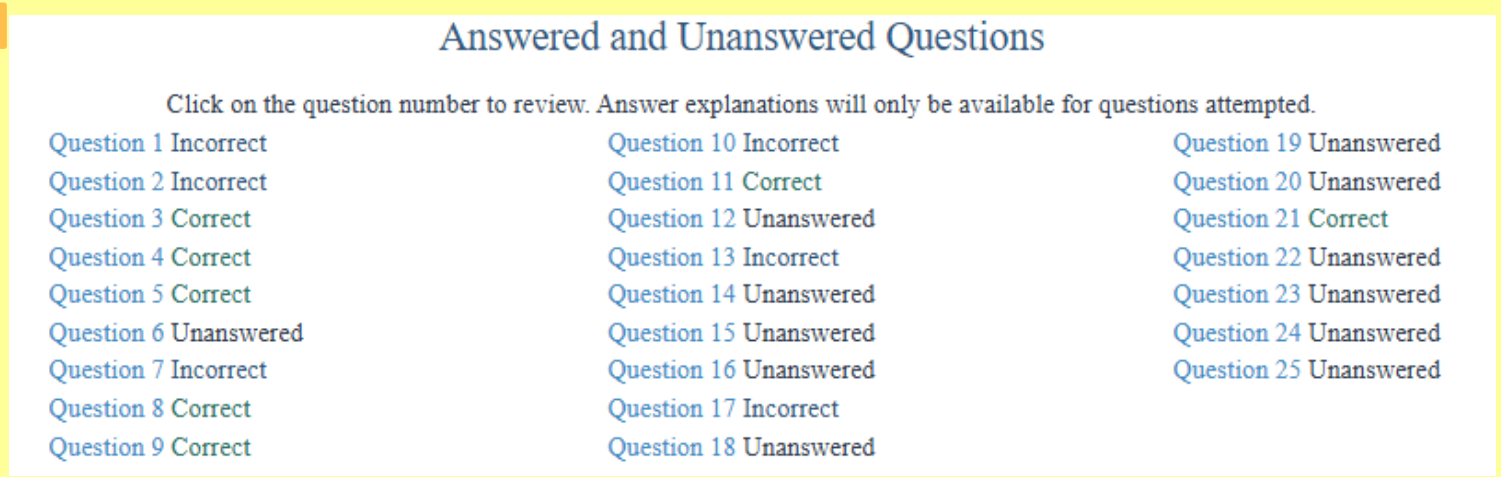

⚠️ **Important Tip:** Try to pass the practice test within two attempts (a 2nd attempt should **not** be within 2 weeks.) Taking the same practice test three or more times usually means it's time to pause and ask your instructor for extra help instead of re-testing.

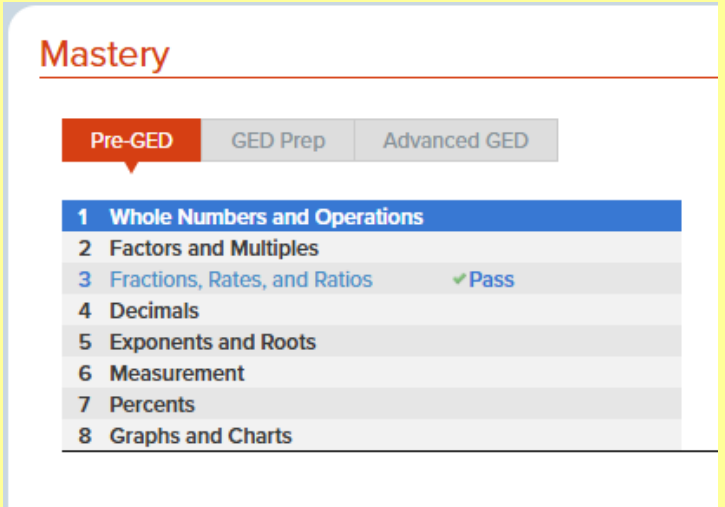

🔔 Check Your Notifications:

- **Assignments Tab:** A number here means your instructor has sent you a specific assignment to complete.
- **Review Tab:** If a number appears here, you have lessons that require review. Please complete these before moving on to a new test or taking the official GED Exam.

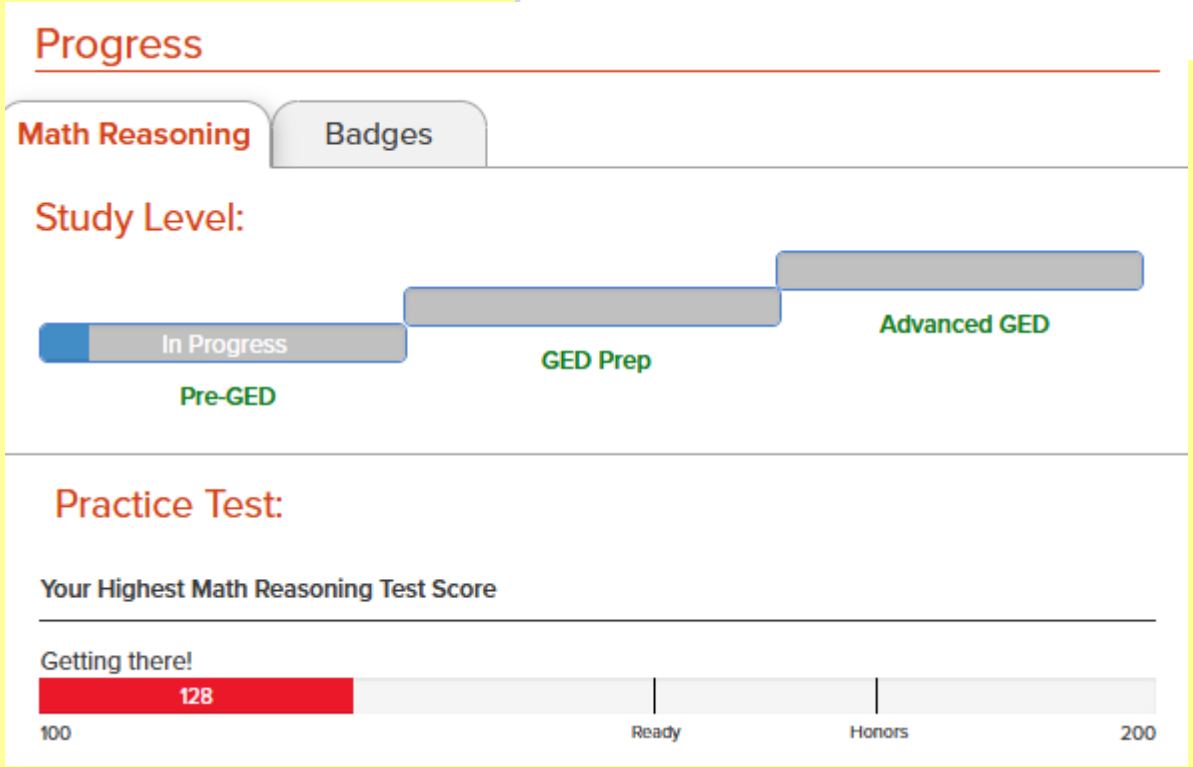

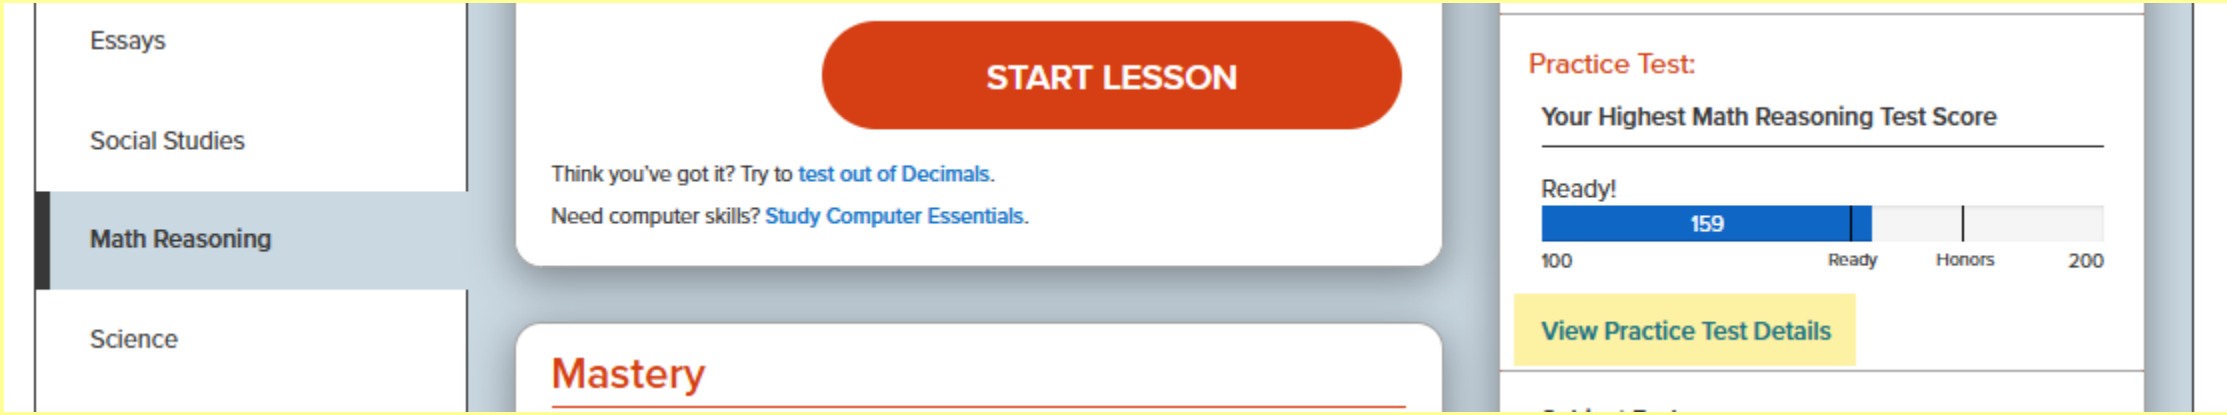

What Happens After Test 1?

Once you complete your first practice test, a personalized **Learning Plan** will appear under your **Mastery** tab. This plan highlights the exact lessons you need to master before unlocking each of next **timed tests**.

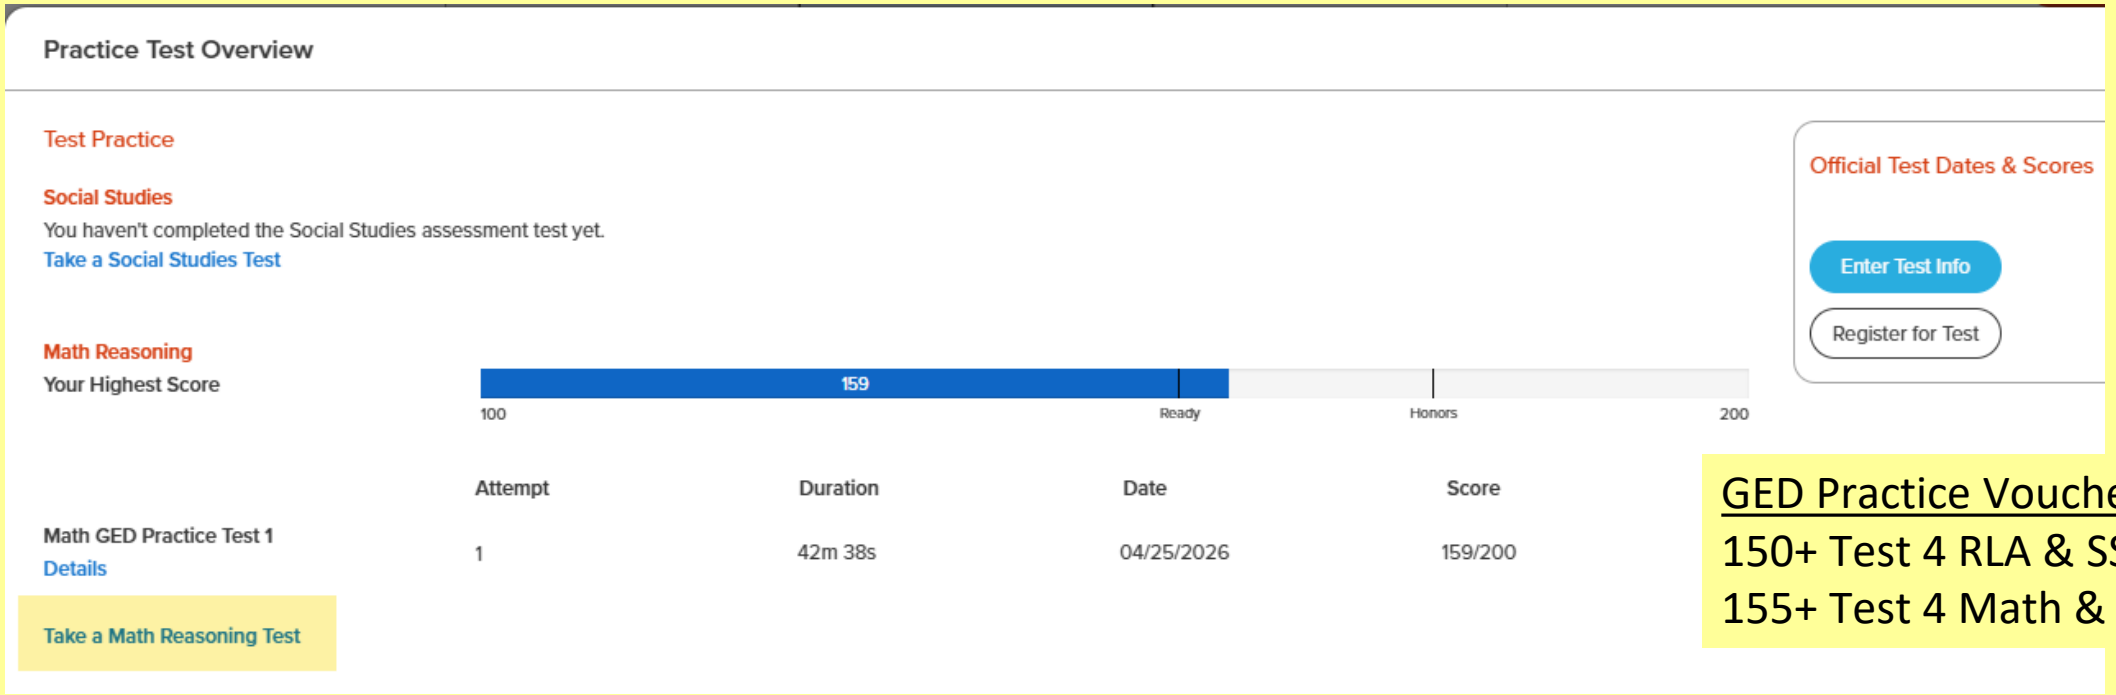

Keep an eye on your **Progress Bar**—it tracks your growth and shows you exactly how close you are to your goal. Remember: the more time you invest in your lessons now, the sooner you will crush the GED Exam!

Clicking on **View Practice Test Detail** at the below where students & teacher could review your test.

Details will allow you to visit this version of your test. The highlighted test will allow you to take next test.

155+ Test 4 Math & Science

Wrap-up of how to pass the GED faster

1. **Leverage the "Test-Out" Feature First**
   Take the Unit Practice Tests first, that will eliminate lessons for material you already know.
   Skip the Fluff by testing-out.
2. **Decode the Explanations (The Secret Weapon)**
   When you get a question wrong during a lesson, don't just click "Next" in frustration.
   Read the rationale. Essential Ed provides broken-down steps for *why* an answer is correct.
   Spending 60 seconds understanding a mistake saves you hours of retaking the same lesson modules later.
3. **Use the 30-Minute Sprint Technique**
   Set a timer for **30 minutes** of uninterrupted study on the platform.
   Complete **one specific sub-lesson or skill card**, then step away for 5 minutes.
   Two highly-focused 30-minute sessions per day.
4. **Target High-Yield Math Formulas**
   If you are tackling the math section, do not try to memorize every single geometric formula.
   Learn how to read the **GED Formula Sheet** provided on the exam.
   Focus your Essential Ed lessons on **Algebra and Functions**.

Efficiency Rule of Thumb: If you miss three questions in a row on a specific concept, stop guessing. Step back, watch the 2-minute introductory video for that specific skill, and try again. Guessing blindly ruins the adaptive algorithm and slows down your overall completion rate.

Always complete ALL suggested lessons before going onto the next Unit!

Are you READY to smash your goals? This is your recipe for success:

- **Trust the Plan:** Complete every lesson in your customized Learning Plan.
- **Watch the Tabs:** Keep your Review and Assignment tabs at zero needs.
- **Put in the Time:** Aim for more than the minimum 2 hours a week to fast-track your graduation.

Your GED finish line is closer than you think. **Maximize** your study time today!

Crush your GED Exam
And Graduate!
